

**Marble Bathroom: marble bath surrounds, vanity tops, countertops, book-matched marble, etc.**

We have been supplying & installing marble tiles and bespoke cut to size marble for both commercial and residential projects in London, Middlesex, Surrey and other parts of the UK.

Cut to size marble and other natural stone or man-made work includes: vanity tops or countertops, bath surrounds, wall and floor cladding, shower trays, window sills, shower niche cladding.

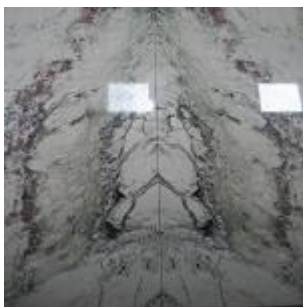

As marble and stone contractors we source, supply, fabricate and install marble and other stone for bathrooms and beyond. We make sure the substrate is adequate for the stonework and advise on or execute required water proofing, including ditra-matting . More details on the installation of natural stones in wet areas can be found here:

[http://www.stoneville.co.uk/Installation\\_Wet\\_Areas.pdf](http://www.stoneville.co.uk/Installation_Wet_Areas.pdf) and <http://www.stoneville.co.uk/Fixing%20natural%20stones.pdf>

The most popular marble colours for bathrooms, based on our experience, are:

- white marble like Thassos or Vietnam White;
- white veined marble like Calacatta, Bianco Carrara, Statuario,;
- grey marble like Grey Marquino;
- black marble like Nero Marquina;
- beige marble like Crema Marfil;
- Combination thereof.

Some types of marble like Calacatta, Statuario or Paonazzo can often be book-matched for walls and floors, creating unique patterns.

Book-matched marble panels for a bathroom

Marble bathroom is an important feature in today's high end interiors, similar to bespoke kitchen worktops made of quartz or granite.

We work with architects and designers on projects where marble bathrooms are often one of the key parts of the whole project. On high end projects cut to size marble slabs are often specified for walls and floors, not just for bath surrounds or vanity top or shower trays.

For marble bathrooms, like for any type of bespoke work, quality of craftsmanship is very important, as well as experience of marble installers in working with a particular type of marble to ensure top quality of marble slabs or tiles, as well as that of the end product.

Other materials we have been successfully supplying and installing in bathrooms include neoparies and Stoneville Recycled Glass.

Pictures of some of recent marble bathroom projects are featured on our website, <http://www.stoneville.co.uk> .
